## Capabilities Statement

---

International Energy Savers has been a window film provider locally and nationally since 1985. Offering an assortment of products to government agencies including safety security films, solar protective films, and specified designed products to match our customer's needs. We offer turnkey services from energy audits, to window film installation and project management.

International Energy Savers of Central Florida, Inc. ("IES") has been installing solar, security, and decorative films for over 39 years. We are certified through most major window film manufacturers for security film installation such as 3M, Eastman, Solar Guard, Madico, Avery, etc. Installing 4-14 mil products requires a high level of detail and skill in order to achieve optimal consistency and a clean installation. "IES" has trained professionals that use the latest tools and techniques available. All installers hold OSHA certifications for maximum safety on commercial projects. Our professional and quality installation has allowed us to install window film on projects ranging from 100 sq. ft. to over 100,000 sq. ft.

It has been our mission to provide the markets top performing products, with efficient and professional standards. By maintaining all certifications for installing an array of film types, staying up to date on OSHA safety courses, and having years of experience, International Energy Savers has been able to exceed the market's standard for all solar and security film projects. We pride ourselves on the knowledge and performance our experience has offered, not only our team, but more importantly our customers.
